AMENDMENTS TO THE SPECIFICATION

Please **revise paragraph [0035] of the specification** as follows:

[0035] In addition, the first and second main frames 52a and 52b have downwardly sloping linear portions 52ad, 52bd, and tip end portions (horizontal linear portions) 52ah, 52bh extending substantially horizontal on the lower side thereof, and a stopper mechanism 60 for fixing the frame body 14 to a flat-surfaced table 116 or the like is provided at the tip end portions. A control unit 16 is disposed between the first and second main frames 52a and 52b (see FIGS. 1 and 3). Control unit 16 is mounted in a position between linear portions of said pair of the first and second main frames 52a, 52b and under the centrally located main frame 52c, the position of the control unit 16 being such that a major portion of the control unit 16 extends below where the pair of sub-frames 54b are connected to the first and second main frames 52a, 52b.
